

KELLY'S COINS and CHATTER.....

JAMES KELLY
3rd and Broadway
DAYTON 7, OHIO

Vol. 6 - 4

April, 1953

AUCTION SALE

JUNE 1st, 1953

This will be our first big catalogue sale since we conducted the 1951 A. N. A. Convention Auction.

It is the largest and finest sale we have ever attempted. As a matter of fact, it will be one of the outstanding sales conducted in recent years.

There will be 4,573 Lots of choice United States, Foreign and Ancient coins. We have combined four notable collections in this one large sale: The University of Pennsylvania Collection of Foreign Gold and silver; the Oldekopp Collection of Crowns and Multiples; the U. S. Collections of Otto Heaton, Columbus, Ohio and the late Oscar Nielsen of Washington, D. C.

A catalogue worthy of these collections is now being prepared. Seventeen full pages of plates showing the outstanding coins. We have had the help of several notable numismatists in classifying the Foreign and Ancient material in order to give a complete description and reference.

This catalogue will go into the mail the last week in April. A list of the Prices Realized at this sale will be available for \$1.00 before the sale.

Numismatic Convention

HOTEL SYRACUSE May 16, 1953

Canadian SILVER DOLLARS

These dollars are made in mass production and shipped in bags very similar to our own. Consequently many strictly Uncirculated coins shows evidence of contact with other coins. For this reason we are listing both the average Unc. specimens as well as those selected, and free of imperfections.

Here's why REMODELING

During the past five weeks we have fallen behind in orders and correspondence. Not only have we been working day and night in preparation of our June Sale, but we have been completely remodeling our offices. What was scheduled to take two weeks, required five. We will be straightened up and back on schedule by the time you read this.
Thanks for your patience.

THE BENNINGTON VERMONT
HALF DOLLAR

Senate bill 3895, approved February 24, 1925, authorized the issue of three commemorative half dollars - the California Jubilee, the Fort Vancouver, and the Vermont-Bennington pieces. This last coin was issued in 1927 to commemorate the 150th anniversary of the creation of the independent state of Vermont, July 1777, and the Battle of Bennington, August 16, 1777. The designs are by Charles Keck, sculptor of New York City, and they were coined at Philadelphia.

The first of the two events it commemorates is symbolized on the obverse by the portrait of Ira Allen, founder of Vermont, and the other event by the figure of a catamount on the reverse.

Obverse: Portrait of Ira Allen facing right; above "United States of America;" below, "Ira Allen" - "Founder of Vermont."

Reverse: A Catamount walking left; above, "Battle of Bennington," "In God We Trust" "1777-1927," in front, "Aug. 16." Below, "E Pluribus Unum" -- "Half Dollar."

The authorized issue was 40,000 pieces and they sold at one dollar each. "The proceeds will be used as a nucleus of a permanent fund for supporting historical research and fostering interest in Vermont history, and the commission in charge of the sale of the coin, states that "not one cent will go to any broker or others for commission in handling the coin." They will be distributed through the banks of the State. The price of the coin on mail orders will be \$1.25."

40,034 were coined of which 11,892 were remelted, leaving 28,142 outstanding.

Later, in 1927, it was published the profit from the sale of this half dollar will not be used to help defray the expenses of a celebration at Bennington (that city will provide its own funds); instead the proceeds will be held by an incorporated body, the Vermont Historical Trust, as part of a permanent fund, the income of which will be devoted to the following purposes:

A - Promoting interest in the study of Vermont and

JUDAS' "THIRTY PIECES" AND THE GUARD'S BRIBE

The betrayal money received
by Judas, and the bribe --
"large money" -- received by
the guards of Jesus' tomb,
were, it is reasonable to be-
lieve, tetradrachms of Antioch
and tetradrachms of Tyre.
"Large money" means large
coins (Mat. 28:12), and these
silver tetradrachms were the
large coins common to trade.
The tetradrachm of Antioch
has on its obverse a portrait

JUDAS' "THIRTY PIECES" (Continued)

of the first Roman emperor,
Caesar Augustus, emperor when
Christ was born. On its re-
verse is the goddess of
Fortune; Romans called her
Fortuna; Greeks called her
Tyke (ty' ke). Her head is
turreted; she is sitting upon
a rock, and a young god is
swimming about in the stream
at her feet.

The tetradrachm of Tyre
has the god Melkarth on ob-
verse and an eagle on reverse
This was previously described
in the story of THE COIN IN
THE FISHES MOUTH.

Judas sold his Master for
thirty pieces of silver. In
our U. S. money the silver
would be about the equivalent
of \$15.30.

"Then one of the twelve,
called Judas Iscariot,
went unto the chief priests
and said unto them, What
will ye give me, and I
will deliver him unto
you? And they covenanted
with him for thirty pieces
of silver." (Mat. 26:14,15)
That amount, we learn in
Ex. 21:32, was the price of
blood. See also Zech. 11:12,
13. In Exodus it is trans-
lated "thirty shekels of
silver."

Judas brought it back and
flung it at the chief priests
feet. Because it was not law-
ful to put money that was
"the price of blood" into the
Temple treasury (Mat. 27:3-7)
it was used for purchasing a
plot of ground "to bury
strangers in."

The bribe money paid to
Roman soldier guards at Jesus
tomb was, no doubt, the same
kind of coins as those paid
to Judas -- coins of common
circulation.

"And when they were assem-
bled with the elders, and
had taken counsel, they
gave large money unto the
soldiers, saying, Say ye,
His disciples came by
night, and stole him away
while we slept. "And if
this come to the governor's
ears, we will persuade
him and secure you.

"So they took the money,
and did as they were
taught: and this saying is
commonly reported among
the Jews until this day."
(Mat. 28:12-15)

STRANGE THINGS USED FOR MONEY

The beautiful little cowrie shell found all around the shores of the Indian ocean was perhaps the world's first convenient money, and it was used very extensively for that purpose.

Among the strange and unusual things men have employed for money in different times and places were: Cattle, sheep, salt, cocoanuts, grain, olive oil, tea, rice, tobacco, shells, wampum, furs, nails, fish hooks, soap, cheese, cocoa beans, copper plates, silk, cotton, bullets, bamboo and stone.

Chinese cubes of gold may have been the first real metal currency. The bronze, spade-shaped coins of China date back to about 2000 B.C., while about the same time the Egyptians were using metal rings as coins. About 600 BC the Lydians in Asia Minor, under the wealthy and famous Croesus, first began to coin gold and silver and use it in trade, or as a medium of exchange. Greece learned coinage from Lydia; Rome learned it from Greece; and all civilized nations have used coined money ever since.

The coins of a nation are really like historical documents of great value. In some cases they are practically the only reliable information we have concerning certain states and cities of the Ancient world.
